How about 11am CDT, noon eastern?

I added Mark Johnson with ATSDR on here as our health partners will be critical aides to us in messaging.

Mark, if you have time, please call in at 11, the number is below

Hey all,

Diane is currently deployed to the Virgin Islands so I'll be handling the calls to residents. If we could schedule a call for tomorrow that would be great.

On a related note, Jeff and I briefly discussed the results letters EPA would be sending to residents - would it be possible for me to get the draft language before we talk tomorrow? Residents seemed confused by the first round of results so we thought maybe adding a key to help them navigate their results would help them. I'd be happy to type up something along the lines of what I was thinking and get your thoughts on it tomorrow.

What time were you thinking of having this call?

We should have a call tomorrow, but I want to contact the residents as we get full data sets for their individual house

Chelsea or I (or Diane) will contact them as it is preliminary data we can't give the actual numbers as they may adjust during QA/QC and we need to explain that

Currently we only have a handful of residences with full results. A few more results just came in today and I expect more tomorrow as well. I've had the data we have so far summarized and have a team on standby to summarize further data as it arrives. I will send an example of the summary data under separate email, if you could please have a look and let me know what further information you need for contacting homeowners. I anticipate having all of the data in and summarized on Monday. If desired I could also send the results piecemeal as we have the full dataset for a given household completed. Just let me know what works best from your end.

It has been trickling in. I have asked Brent to compile a table for us to use, remember to tell residents it is preliminary data, and just above or below the health advisory for the PFOA+PFOS.

Brent, if Chelsea needs anything please support her. She will be calling residents for EPA.

Hi Jeff,

Do you have an estimate as to when the preliminary data from the sampling we did on 12/27/17 will be ready? I remember you mentioning it would be around 1/8 - I want to be sure I'm on top of things and contact residents as soon as the information is available.

Best,
Chelsea
